## EXPERIENCE

### Bureau Veritas, Noida — Salesforce Developer/Administrator

Sept 2021- Present

*I started at Bureau VERITAS in September 2021 as a new graduate hire, in the year following I worked in Major deliveries and integration automation.*

- ▶ Developed Apex Class and Trigger and linked them to manage Workflow.
- ▶ Used SOQL and SOSL for Data Manipulation.
- ▶ Worked on the designing of Custom Objects, Custom Tabs, Custom Fields, role-based Page Layouts, Custom Reports, and Report Folders, Report extractions to various formats, design of Visual Force Pages, Dashboards and various other components as per the client and application requirements. Maintain User Accounts, Roles and Profiles in the Salesforce.com application.
- ▶ Integrated Salesforce in a python project
- ▶ Execute data loads, set up and manage security, user permissions, password resets, break/fix instructions and data access. Sustain security which will include sharing rules and security levels. Designed, create and maintain user roles, profiles, and hierarchies and monitor application storage usage and archived data daily
- ▶ Address issues and outages reported by users and get them resolved

### CRIS (Center for Railway Information Systems) — Development

Trainee

Duration: 6 weeks

*Project: Waiting rooms management system.*

- ▶ The internship was about Web development in the CRIS Chanakyapuri and different frontend and backend technologies were used in the process of creating and connecting the site.
